

Guitar octave chart

Using octaves to learn notes on the guitar neck

1. Starting on the B note located on the 6th string, 7th fret, use the octave shapes to find all the other B notes on the neck.
2. Play chord, scale or arpeggio shapes with roots on the B notes around the neck to find your preferred sound.
3. Now change to an A note on the 6th string, 5th fret and repeat the process.
4. Easy!

Remember, learning and memorizing notes, chord voicings and scales in this way will improve your playing skills, theoretical knowledge and desirability as a band member.
